

# Hazon Sustainable Israel Tour: Impact Investing

May 12-19, 2019

**Join us for the 2019 Hazon Israel Tour, focusing on impact investing and sustainability. This will be a remarkable opportunity to meet with inspiring changemakers.**

Israel's booming tech and innovation sectors, not to mention a burgeoning world-class food scene, continue to grow dramatically. And, at the same time, Israel is a country beset by many challenges. The interaction between Israel's challenges, and its vibrant creativity, is a fascinating intersection – and one we will explore on this unique trip.

We have designed this trip to focus on several of the most compelling areas of innovation and investment, including climate change, water, and food security. And we'll explore new vehicles for addressing those challenges, including start-ups, social ventures, non-profits – and the fascinating overlaps between all three.

Along the way, we hope to learn more about key challenges facing Israel and the world – and inspiring solutions to those challenges.
