While adults and teens are participating in the Hazon Food Conference, the home of the Jewish Food Movement, kids ages 5-12 will be having their own memorable experience at the Kids’ Food Conference!

Children will engage with field experts in dynamic and age-appropriate ways on the same topics as the adult programming, including cooking skills, nutrition, food justice, and environmental responsibility.

Hazon – meaning “vision” – works to create a healthier and more sustainable Jewish community, and a healthier and more sustainable world for all. In order for this work to succeed, we need young people to become involved in the movement towards a healthier food system. Youth have the power to take our society in a new direction and rethink the world into which they have been born.

It is up to us to make healthy food choices for ourselves, but in many ways our society puts us at a disadvantage. Youth do not have the buying power of adults, yet food advertisements are filled with exciting images of junk food. How do we ingrain the knowledge of healthy snacking into our minds so it is an easy choice to go for carrots and peanut butter instead of potato chips? How do we change the larger system so school food is healthy and tastes good? How can we grow food in our homes and communities? The Kids’ Food Conference will address these issues and more in a dynamic, engaging, age-appropriate way.

**All children must be in a Kids’ Food Conference activity or supervised by a responsible adult.** All activities meet in Arts and Crafts, unless otherwise noted. If you have any questions, please direct them to Arielle Aronoff, Director of Teva.
